V12Tech: The RC and RH are from back in the day when they made 2 transformer systems, 1 transformer would be located in the AC unit and would feed the RC terminal for cooling only.

Nest thermostat says no power to RC wire detected - ASAP

Hi! It sounds like the contactor is not getting enough voltage to the coil. I would suggest that you check the coil voltage and make sure it is getting a minimum of 24 volts if it is a 24-volt coil and 220 volts if you have a 220-volt coil.

Problem: Why I am not getting 24 volts to the contactor

Mis-wiring a 120-volt RV outlet with 240-volts. I've been answering a lot of forum questions lately from RV owners who paid an electrician to install a 30-amp/120-volt TT-30 RV outlet for powering their RV in the driveway.

Mis-wiring a 120-volt RV outlet with 240-volts | No~Shock~Zone

A set of conductors feeding a single load, or each set of conductors feeding separate loads, shall be permitted to be connected

to a transformer secondary, without overcurrent protection at the secondary, as specified in the following conditions:

Overcurrent Protection – Part Five ~ Electrical Knowhow

AC Evaporator Coil Inspection. The following is a photo of my central air conditioner evaporator coils before cleaning. The AC coils look very clean already because I service my system regularly.
