

ICSLP 96 PROCEEDINGS FOURTH INTERNATIONAL CONFERENCE ON SPOKEN LANGUAGE
PROCESSING

Download

icslp 96 proceedings fourth pdf

Turn-taking is a type of organization in conversation and discourse where participants speak one at a time in alternating turns. In practice, it involves processes for constructing contributions, responding to previous comments, and transitioning to a different speaker, using a variety of linguistic and non-linguistic cues.

Turn-taking - Wikipedia

Research highlights An overview of redundancy across disciplines is provided at the beginning. In discourse, redundancy can have different linguistic forms, and perform various functions. Textual, contextual, interactional, social, and psychological parameters should be considered. Some aspects of redundancy, related to repetition and intensity are discussed and exemplified. Redundancy as a ...
